EXPERIENCE TO AID YOU IN WORKING ON THESE ADVISORY BOARDS: As an environmental health researcher with a Master of Public Health degree, I am knowledgeable about the effects of human behavior on our environment, and in turn on our health. My experience as a member of the planning committee for the North Carolina Environmental Justice Network has further educated me about the connection between a healthy environment and healthy communities, and increased my awareness of the empowerment that results when communities are able to use scientific data to make decisions about their wellbeing. In addition to my public health degree, my work as a door-to-door canvasser for the Colorado Public Interest Research Group and my motivation to inform my personal goal of a minimized ecological footprint have served to increase my education about key environmental issues such as the impacts of hyper-consumption, waste production, urban sprawl, industrial farming, transportation use, energy production, and chemical exposures, but more importantly how to find

alternatives to the practices that produce these situations.

REASON(S) YOU WISH TO BE APPOINTED: I believe participation in local government is critical and I have been looking for a way to become more involved. I see the Air Quality Advisory Committee as an exciting way that I can use my education and commitment to environmental health to serve my local community. I am especially excited to contribute to a proactive process that will be an example to other municipalities regarding opportunities to seek solutions to the level of greenhouse gases we are contributing to the atmosphere, a concern both to the environment and our health.

HAVE YOU EVER SERVED ON ANY TOWN OF CARRBORO ADVISORY BOARD? IF "YES", WHICH ONE(S) No
