Town of Carrboro

Storm Drain Decal Design Contest

The Town of Carrboro wants to protect local creeks, rivers and lakes by preventing stormwater pollution. Stormwater is runoff from rain or melting snow. It becomes polluted as it flows across developed areas. Water entering storm drains, like those found along curbs in Carrboro, does not flow to wastewater treatment plants. Stormwater flows untreated into our creeks, rivers, and lakes.

Because many people do not know the facts about stormwater, Carrboro needs your help! We want you to design a decal we can use in a town-wide storm drain labeling program. These decals will teach people about stormwater pollution, and help keep our water clean. So let your creative spirits flow, and may the best design win!
