Downtown Parking Chronology

1989	
	Carrboro Parking Facility Report is prepared by students at UNC-Chapel Hill
2002	
April	Board of Aldermen creates the Parking Task Force
October	Parking Task Force Report is presented to the Board of Aldermen
2002	
2003	Chaff and country and to the Decard of Alderson on invalous which the Doubing
February	Staff presents a report to the Board of Aldermen on implementing the Parking Task Force Report recommendations
February	Board of Aldermen adopts a cross-section plan for Roberson Street, which
	included on-street parking
April	Board of Aldermen approves a Town Code amendment that provides 18 new
	on-street parking spaces on Sweet Bay Place
2004	
April	Opening of public hearing on LUO text amendment to modify downtown
Maria	parking requirements
May	Continuation of the LUO text amendment modifying downtown parking requirements; Board of Aldermen approved modifications to the downtown
	parking requirements such that 1. For uses 1.100, 1.200, and 1.300 under part two
	- change to one per bedroom and no more than two. 2. That the Town Attorney draft
	language which would require covenants that the number of vehicles per dwelling unit
	be limited to no more than two. 3. For uses 3.00 the # would be 400 sq. ft 2.00
	remains 300 ft.
2005	
June	Presentation of the Downtown Circulation Study, which includes additional
	recommendations for on-street parking
2008	
January	Downtown parking supply & demand study gets underway
April	Students from UNC-Chapel Hill present their study to the Board of Aldermen
November/December	ESC makes recommendations on moving forward with a parking plan

2009	
January	Staff report to the Board of Aldermen on parking study follow up

SPRING 2008 DOWNTOWN PARKING STUDY SUMMARY

SUMMARY OF KEY STUDY FINDINGS

- 1. Current parking demand does not exceed the ideal of 85% occupancy (for the entire downtown).
- 2. Current parking demand *does* exceed ideal occupancy in certain subzones, at specific times of day and this demand projected to increase with future developments.
- 3. There is high turnover of spaces in the CBD.
- 4. In public lots, there is a 20% violation of the 2-hour time limit.
- 5. There is high demand for proximate parking to one's destination.
- 6. Perception among business owners is that there is a parking shortage in the downtown.
- 7. When the approved and proposed downtown developments reach build-out, a parking shortage in the sub-zone around the 300 E Main property is forecast(ed).

REVIEW OF KEY RECOMMENDATIONS (see page 35-42 of the parking study to read the full recommendations)

Improve lighting, signage, and wayfinding

[wayfinding = wayfinding is used in the context of architecture to refer to the user experience of orientation and choosing a path within the built environment, and it also refers to the set of architectural and/or design elements that aid orientation – from wikipeida.]

This recommendation has strong roots in past planning efforts including:

Carrboro Downtown Business District Guidelines for Design (1993)

http://www.townofcarrboro.org/PZI/PDFs/DowntownDesignGuidelines.pdf

If you have a chance to review this document I would point you in the direction of the following pages: 1 (goals 1 & 7); 10, 13, 15-16, 19, 21, and 33

Downtown Carrboro: New Vision (2001/2)

See page 16, item #13

Carrboro Vision 2020

http://www.townofcarrboro.org/PZI/PDFs/Vision2020.pdf

p.16 "To improve the downtown infrastructure (e.g. parking facilities, sidewalks, lighting, shading) to meet the needs of the community."

p.17 "Walkability should be encouraged downtown and pedestrian safety and comfort should be a goal. The town should improve lighting and shading, and create auto barriers."

Downtown Employer/Employee Parking strategies

According to the study: "Twenty-three percent of survey respondents replied that they would be interested in exploring park-and-ride options for their employees, suggesting a somewhat favorable atmosphere for implementing changes in travel behavior. Through a travel demand management program or similar scheme, employees could be encouraged to utilize transit service (including park-and-ride), to bike, or to walk, when traveling to work. This program could be implemented with a concurrent improvement in facilities like bicycle parking and shower facilities for commuters. A related solution could be an employee shuttle that carries downtown employees from parking lots located outside of the CBD."

The basic premise is that employers would provide incentives for employees to not drive, or not drive alone, to work (thus freeing up parking for customers). The types of incentives would be decided by either the individual business owner or it could be a collaborative effort among businesses. In transportation lingo, this is called Transportation Demand Management (TDM).

New time restrictions on public lots/Enforcement

Both of these recommendations require regular enforcement of parking limits to achieve the goal of greater turnover and thus more spaces available for parking in the public lots. At this time, the Police Department does not have the resources to regularly enforce the lots.

24 out of 29 respondents to the survey indicated that they did not think enforcement would impact parking supply. However, without enforcement, the use of time limits in public parking lots is for the most part on the honor system.

Joint use of existing lots

This strategy is already used widely in Carrboro's downtown both formally and informally. The questions for the CBD are:

Are these arrangements working? If there are places where they are not working, why and how can we improve the situation (better signage, different lot layout)?

Are there any untapped opportunities?

Increasing the supply of public parking

While this was not an explicit recommendation in the study, it is nonetheless a possible course of action.

ESC PARKING RECOMMENDATIONS 12/10/08

Strategies to be pursued immediately:

- 1. On street parking opportunities (evaluate Roberson/check transportation study)
- 2. Walkability & signage improvements
- 3. Parking consolidation and sharing opportunities
- 4. Monitoring on regular basis of downtown parking status (a la UNC student study), and of implementation of recommendations
- 5. Transportation Demand Management strategies, short term

Recommend that the Board of Aldermen authorize a comprehensive parking plan (goals, objectives, strategies, implementation, etc) including:

- 1. Revising the parking ordinance
- 2. Parking enforcement and fees
- 3. Parking development fund
- 4. Structured parking
- 5. Transportation Demand Management strategies, long term

The ESC voted to recommend the above parking recommendation:

The vote was unanimous by (Peter Lee, Jefferson Parker, Nathan Milian, Gary Kramling, Alena Callimanis, Ellie Kinnaird)
