Staff communications regarding Town-managed park-and-ride feasibility	FOR INFORMATION CONTACT: Jeff Brubaker – 918-7329

PURPOSE

On February 28, 2012, the Board of Aldermen received a report on locating a Triangle Transit stop near the municipal parking lot on W. Weaver St. The Board requested additional information on converting spaces from two-hour-limit to park-and-ride spaces and the feasibility of Triangle Transit stops at other locations. This agenda item includes the information.

INFORMATION

More information is provided in the memo in *Attachment B*.

FISCAL AND STAFF IMPACT

At its February 28, 2012, meeting, the Board resolved: “Subject to a follow-up report from staff, the Board shall communicate its intention to extend service to Carrboro to Triangle Transit.”

If the Board maintains this intention, approximately five staff hours will be needed to prepare the communication and follow-up with Triangle Transit staff. The subsequent staff hours necessary to assist in further planning for bus service extension to Carrboro would be influenced by direction from Triangle Transit staff.

Service improvements for the Triangle Transit 405 limited-stop bus route, including an extension of the route into Carrboro, are included in the Bus and Rail Investment Plan in Orange County,

adopted by the Orange County Board of County Commissioners on June 5, 2012. The total new annual service hours for these improvements is 1,506. The investment plan describes services that could be funded by sales tax revenues if a referendum to implement the half-cent sales tax for transit is approved in Orange County. Half of the additional hours for the Route 405 improvements would be funded by Durham County, and half by Orange County.

Designating park-and-ride spaces would include expenses for signage and potential staff hours to administer a hang tag option, if such an option is implemented, as described further in the memo in *Attachment B*. Other amenities such as covered bike parking or a bus shelter, if pursued, would have additional costs. The Bus and Rail Investment Plan does include some capital funding available for bus stop/access improvements, although a method for distributing this funding has yet to be solidified.

RECOMMENDATION

Staff recommend that the Board adopt the resolution (*Attachment A*) confirming the Board's preference to communicate its intention to extend service to Carrboro to Triangle Transit and prioritizing the location of the stop.
